ABOUT THE EVENT

In today's fast-changing and highly competitive business environment, the risks of poor decisions are greater than ever. Logical thinking requires reasoning and facts. It's needed to instil sensible strategies to a problem that allow you to make rational conclusions about how to proceed. A lack of logical thinking within your teams and your business can be disastrous.

This workshop will provide a practical introduction to logical reasoning, explore key concepts and ideas with a pragmatic view toward implementation, and deliver hands-on exercises for developing your own logic and reasoning skills.

DAY ONE

What is logical thinking?

- ▶ Explore and apply key concepts in logical thinking
- ▶ Deductive reasoning vs inductive reasoning
- ▶ Identify obstacles to logical thinking

Develop the habit of questioning

- ▶ Hone your questioning skills and use them to your advantage
- ▶ Effectively distinguish between facts and interpretations - Check the validity
- ▶ Avoid questions that cast judgement rather than ideas

Create a strategy - Think before you start doing

- ▶ Practical tools and strategies to organise your thoughts
- ▶ The use of Mind-mapping
- ▶ Adjust your perspective and understand your biases
- ▶ Accepting information with an open mind
- ▶ Working with resistance - Don't make it personal
- ▶ Find your personal persuasive style

Bringing it all together

- ▶ Doing the logic test - does this make sense?
- ▶ Develop a willingness to resolve - Admit when you realise you are wrong
- ▶ Self-reflection and feedback

YOUR FACILITATOR

Bethan Winn is an experienced educator, facilitator, coach and speaker specialising in critical and creative thinking, communication skills and community building. Her experience spans all ages, sectors and industries, but she always brings her interactive, paced facilitation; warm, playful attitude and depth of knowledge to any learning experience she facilitates, to ensure learning is enjoyable as well as challenging and valuable. Providing evidence-based research, practical tools and time to apply the learning and action plan in-session, participants are left with clarity, confidence and a toolkit to think better, communicate effectively and take action in their work and home life.
